**A Memo to Your Top Management Team: #12 “Area of a Triangle?”**

Suppose you have a large group of employees who occasionally need to calculate the Area of a Triangle given the lengths of two of its sides and their included angle.

Let’s have some fun. Draw a triangle with two sides of lengths 12.4 Units and 18.7 Units and included angle of 38.5 degrees.

Calculate its Area using a \$10 Scientific Calculator. (ANS 72.2 Square Units) Have one of your techies do it, if you aren’t so inclined.

How long would it take one of your workers to figure this out?

You can train any worker (even an executive) how to do this in less than thirty seconds, accurately and easily. The training is quick and easy too!

Notice: We are giving Process Training, NOT Education.
